

About this report

This Green Bond Investor Report provides an overview of Arbejdernes Landsbank's green asset portfolio eligible under the Green Bond Framework 2023. The report also provides details of the allocation of proceeds and the estimated avoided emissions our lending activities have achieved.

We sincerely thank all our investors for your contribution to channel capital to investments that contribute to the sustainable development and green transition in society and reduce the derived negative impacts, including the financed greenhouse gas emissions.

In August 2023, Arbejdernes Landsbank launched its first Green Bond Framework. The Framework has been developed in accordance with the 2021 ICMA Green Bond Principles and Sustainalytics have provided a second-party opinion. Sustainalytics have concluded that the framework is credible, impactful and aligns with the four components of the Green Bond Principles of 2021.

The report covers Arbejdernes Landsbank's two green bond issuances, which total approximately DKKbn 3.2 since the launch of our Green Bond Framework in August 2023. The bank issued DKK 1,000 million in Senior Preferred with a green format in September 2023 and EUR 300 million in Senior Non-Preferred with green format in March 2024. Both issuances attracted strong investor interest and have been well received by the market.

In the last year, we have seen continued growth in the green loans provided by the Arbejdernes Landsbank Group. The Eligible Green Asset Portfolio grew from DKKbn 4,4 in Q2 2024 to 6,1 in Q2 in 2025. Green Transportations is the key driver behind the growth of the portfolio. Please note that Arbejdernes Landsbank from December 2023 have chosen to exclude 'buildings built after a certain year' in the top 15%, in accordance with the European Commission's Q&A. This means that we excluded around DKKm 500 from the Green Buildings category in Q3 2023.

Green Buildings and Green Transportation remain the only categories included in the Green Bond Framework, but we aim to enable an inclusion of more categories in the long run.

43 per cent of the portfolio was new financing and 57 per cent was refinancing of existing projects and assets.

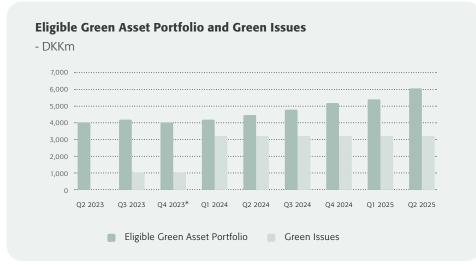

The Arbejdernes Landsbank Group have focused for several years on actions that support the reduction of greenhouse gas emissions among our customers and in our own operations. Among several green initiatives and targets for the Group, one of the overall goals is to offer attractive loans, to make it more attractive to customers to make more sustainable choices. We have also increased dialogues with the largest customers regarding ESG considerations including their transitions plans.

Methodology

Key reporting principles

Arbejdernes Landsbank's reporting on environmental impact is guided by the ICMA's Harmonized Framework for Impact Reporting Handbook (June 2024), and the Nordic Public Sector Issuers' Position Paper on Green Bond Impact Reporting 2024.

The reported distribution and impact are based on the status of the Green Asset Register as of 30 June 2025. The full-year impact is accounted for regardless of when an asset is included in the Green Asset Register.

Impact methodology

Calculation methods, assumptions and relevant baselines are specified below. It should be noted that calculation of environmental impact is subject to uncertainties which cannot be totally eliminated.

Only impact resulting from Arbeidernes Landsbank's share of the financing is reported on. Arbeidernes Landsbank reports on the share of the project's total investment cost that has been financed with proceeds from the green bond.

The reported impact is based on amounts disbursed and outstanding for a project.

Estimated data on avoided emissions

For green buildings, where Arbejdernes Landsbank are unable to obtain the actual energy consumption, we estimate the expected energy demand based on building type, ECP label, area and heating source, corresponding to the FIDA CO2 model. The estimated avoided emissions for green buildings are calculated on Group level. Avoided emissions for clean transportation only includes AL Finans' portfolio.

		Calculation of emissions avoided	Parameters and assumptions
6	Green Buildings	(Expected annual energy demand for reference building (kWh) – (Expected annual energy demand for financed building (kWh)) * Emission factor of heating source (gCO ₂ e/kWh)	Emission factors: • Electricity: 197 gCO ₂ e/kWh (Source: The Danish Energy Agency) • District heating: 65 gCO ₂ e/kWh (Source: The Danish Energy Agency) • Natural gas: 204 gCO ₂ e/kWh (Source: The Danish Energy Agency) • Fuel Oil: 281 gCO ₂ e/kWh (Source: The Danish Energy Agency) Baseline energy demand: Green buildings are benchmarked against the minimum requirements set by the building code BR08, which corresponds to a national EPC B lab
\$	Clean Transportation	(Alternative fuel-based emission factor (gCO ₂ e/km) – vehicle specific emission factor (gCO ₂ e/km)) * annual kilometres	Alternative fuel-based transportation: 129.96 gCO ₂ e/km (Source: Danish Centre for Environment and Energy (DCE)) Vehicle-specific emissions: 25.65 gCO ₂ e/km (Source: Danish Centre for Environment and Energy (DCE)) Average driving distance for Danish electric cars (Source: DCE): • Electric vehicles: 17,914 km/year

Clean Transportation

Arbejdernes Landsbank Group have for several years offered incentives for customers to choose electric vehicles by offering loans on attractive terms. Furthermore, AL Finans is working to develop new products and services that will make it easier for customers to choose electric vehicles over petrol and diesel vehicles.

UN SDG mapping and environmental objective

Green **Buildings**

Arbejdernes Landsbank Group have initially focused our goals and actions towards loans for owner-occupied housing¹. The Group have set a reductions target of 75 per cent in emission intensity for owner-occupied housing (kg CO2e/m2) in 2030 compared to 2022. We offer a range of products and services that support customers in reducing GHG-emissions from housing e.g. energy efficiency renovations and changing of heating type from oil or gas boilers to an electrical heat pump or district heating. We are continually considering how to reach house owners with information that is relevant for their housing situation.

Independent auditor's assurance report on green bond allocation reporting

To the shareholders of Aktieselskabet Arbeidernes Landsbank

As agreed, we have performed an examination with a limited assurance, as defined by the International Standards on Assurance Engagements, on Aktieselskabet Arbejdernes Landsbank Group's green bond loan allocations specifically as presented in the illustrations on page 3, column "Eligible Green Asset Portfolio" in the table on page 4, "Total amount disbursed (DKKm)" on pages 6-7 and issued bonds information on page 8 in the Green Bond Investor Report 2025 for the period ended 30 June 2025 (the green bond loan allocations).

In preparing the green bond loan allocations, Aktieselskabet Arbeidernes Landsbank Group applied the allocation criteria as defined in the Aktieselskabet Arbeidernes Landsbank's Green Bond Framework (the Green Bond Framework). The green bond loan allocations need to be read and understood together with the Green Bond Framework, which Management is solely responsible for selecting and applying. The absence of an established practice on which to derive, evaluate, and measure the green bond loan allocations allows for different, but acceptable, measurement techniques and can affect comparability between entities and over time.

Other than as described in the preceding paragraphs, which sets out the scope of our engagement, we did not perform assurance procedures on the remaining information included in the Green Bond Investor Report 2025, and accordingly, we do not express an opinion on this information.

Management's responsibilities

Aktieselskabet Arbejdernes Landsbank's Management is responsible for selecting the Green Bond Framework criteria, and for presenting the green bond loan allocations in accordance with the Green Bond Framework, in all material respects. This responsibility includes establishing and maintaining internal controls, maintaining adequate records, and making estimates that are relevant to the preparation of the green bond loan allocations, such that it is free from material misstatement, whether due to fraud or error.

Auditor's responsibilities

Our responsibility is to express a conclusion based on our examinations on the presentation of the green bond loan allocations in accordance with the scope defined above.

We conducted our examinations in accordance with ISAE 3000 Assurance Engagements Other than Audits or Reviews of Historical Financial Information and additional requirements under Danish audit regulation to obtain limited assurance for the purposes of our conclusion.

EY Godkendt Revisionspartnerselskab applies International Standard on Quality Management 1, ISQM1, which requires the firm to design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

We have complied with the independence and other ethical requirements of the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code), which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour as well as ethical requirements applicable in Denmark.

Description of procedures performed

In obtaining limited assurance over the green bond loan allocations, our objective was to perform such procedures as to obtain information and explanations which we consider necessary in order to provide us with sufficient appropriate evidence to express a conclusion with limited assurance.

The procedures performed in connection with our examination are less than those performed in connection with a reasonable assurance engagement. Consequently, the degree of assurance for our conclusion is substantially less than the assurance which would be obtained had we performed a reasonable assurance engagement.

As part of our examinations, we performed the below procedures:

- Interviewed those in charge of the green bond loan allocations to develop an understanding of the process for the preparation of the green bond loan allocations and for carrying out internal control procedures.
- Performed analytical review of the data and trends to identify areas of the green bond loan allocations with a significant risk of misleading or unbalanced information or material misstatements and obtained an understanding of any explanations provided for significant variances.
- Based on inquiries we evaluated the appropriateness of the Green Bond Framework criteria used, their consistent application and related disclosures in the green bond loan allocations. This includes the reasonableness of estimates made by management.
- Designed and performed further procedures responsive to those risks and obtained evidence that is sufficient and appropriate to provide a basis for our conclusion.
- In connection with our procedures, we read the other sustainability information in the Green Bond Investor Report 2025 and, in doing so, considered whether the other sustainability information is materially inconsistent with the green bond loan allocations or our knowledge obtained in the review or otherwise appear to be materially misstated.

In our opinion, the examinations performed provide a sufficient basis for our conclusion.

Conclusion

Based on our examinations and the evidence obtained, nothing has come to our attention that causes us to believe that the information in the illustrations on page 3, column "Eligible Green Asset Portfolio" in the table on page 4, "Total amount disbursed (DKKm)" on pages 6-7 and issues bonds information on page 8 in the Green Bond Investor Report 2025 for the period ended 30 June 2025 (the green bond loan allocations) has not been prepared, in all material respects, in accordance with the criteria as set out in Aktieselskabet Arbejdernes Landsbank's Green Bond Framework.

Disclaimer

This report has been prepared by Arbejdernes Landsbank A/S (The "Bank"). It is provided solely for informational purposes and should not be considered as investment, legal or tax advice. The report does not constitute or form part of, and should not be construed as, an offer to sell, or the solicitation or invitation of any offer to buy or subscribe for, securities in any jurisdiction or an inducement to enter into investment activity.

No representation, warranty or undertaking, expressed or implied, is or will be made by the Bank, its affiliates, advisers or representatives or any other person as to, and no reliance should be placed on, the truth, fairness, accuracy, completeness or correctness of the information or opinions contained in the report (and whether any information has been omitted from the report). To the extent permitted by law, the Bank and each of its directors, officers, employees, affiliates, advisers and representatives disclaim all liability whatsoever (in negligence or otherwise) for any loss however arising, directly or indirectly, from any use of the report or otherwise arising in connection with the report. Further, labelling certain securities as Green Bonds does not, directly or indirectly imply any representation or warranty of any kind that these securities will satisfy the expectation or perception of any third party, as to what a Green Bond-label entails, neither at issuance nor in the future.

The information in the report contains financial information regarding the businesses and assets of the Bank and its consolidated subsidiaries. Such information may not have been audited, reviewed or verified by an independent accounting firm. The inclusion of such financial information in the report should not be regarded as a representation or warranty by the Bank, any of its affiliates, advisers or representatives or any other person as to the accuracy or completeness of such information's portrayal of the business, financial condition, results of operations, trading position or prospects by the Bank and should not be relied upon when making an investment decision.

Certain data in the report was obtained from various external data sources and the Bank has not verified such data with independent sources. Accordingly, the Bank makes no representations as to the accuracy or completeness of that data,

and such data involves risks and uncertainties and is subject to change based on various factors. In addition, certain data in the report has been rounded. As a result of such rounding, the totals of data prescribed in the report may vary slightly from the arithmetic total of such data.

The report may include forward-looking statements prepared by the Bank. Any opinions, forecasts, projections or other statements other than statements of historical fact are forward-looking statements. Such statements are based on current expectations and are subject to risks and uncertainties that could cause actual results or developments to differ materially from any expected future events or results referred to in or implied by these forward-looking statements. The forward-looking statements contained in the report speak only as of the date the report was prepared and the Bank does not undertake any obligation to upgrade or revise any forward-looking statements, whether as a result of new information, future developments, occurrence of unanticipated events or otherwise. Any forward-looking statements contained in the report are expressly qualified in their entirety by the cautionary statements contained or referred to in this section.

The distribution of the report in certain jurisdictions may be restricted by law and persons into whose possession the report or other information referred to therein comes should inform themselves about and observe any such restrictions. Any failure to comply with these restrictions may constitute a violation of the securities laws of any such jurisdiction. The report and any materials distributed in connection therewith are not directed to, or intended for distribution to or use by, any person or entity that is a citizen or resident or located in any locality, state, country or other jurisdiction where such distribution publication, availability or use would be contrary to law or regulation or which would require any registration or licensing with in such jurisdiction. The Bank does not accept any liability to any person in relation to the distribution or possession of the report in or from any jurisdiction. Nothing in the report should be construed as legal tax, regulation, accounting or investment advice. Each recipient of the report should make its own independent investigation and appraisal of the business, operations, financial condition, prospects, creditworthiness, status and affairs of the Bank and consult with its own legal, tax, regulatory, accounting or investment advisers to the extent necessary.
