Continued growth for Arbejdernes Landsbank

Arbejdernes Landsbank continues its positive earnings growth, and with interim results of DKK 274 mill. before tax and a return on equity before tax of 7.5% for the half year, the Bank is well on track to meeting expectations.

The financial sector is preparing to meet the new legislative regulations which are to be implemented towards 2019 with ever stricter requirements for equity. In addition to focusing on solvency, a number of initiatives aimed at the cash resources of credit institutions will also see the light of day. The requirement for ensuring capital resources is predicted to result in continued adjustments in the sector. For active players in the Danish world of finance, this development emphasises the need to have well consolidated businesses.

In Arbejdernes Landsbank, we will persistently continue to adapt to these challenges. The takeover of three branches from Østjydsk Bank in June fits perfectly into our strategy; we want to create sustainable growth and we want to do our very best to ensure that customers as well as employees feel welcome in Arbejdernes Landsbank.

In the 1st half year, the Bank welcomed 17,000 new customers (net) of which 7,000 can be attributed to the three new branches taken over. In the 2nd half year, we

will open new branches at Østerfælled Torv on Østerbro in Copenhagen and on Randersvej in Aarhus.

In January we outsourced money supply and nine employees to the co-owned Bankernes Kontantservice A/S. We recognise that, over time, security-related aspects will require other solutions, and that with this new solution we can ensure continued jobs for colleagues who are affected by the change.

Arbejdernes Landsbank is a busy place, and we recognise that we are only able to cope with the current influx of customers because of our skilled and committed employees. This is the fruit of the concept we have chosen; that providing service and offering advice is a matter of course. In addition, these developments are rubbing off on the Bank's business and the sum of loans, guarantees and deposits has risen by 6.8% or DKK 3.1 bn. since the turn of the year. Taking over the three branches from Østjydsk Bank has contributed with DKK 1.7 bn. and this is a significant reason for the high level of business activity.

As planned, Arbejdernes Landsbank has redeemed stateguaranteed funding of around DKK 2 bn. in the first half year of 2013. Group deposits for the first half year increased by DKK 2.7 bn. despite this redemption of funding.

The Group maintains considerable excess liquidity of DKK 10.9 bn. against DKK 9.3 bn. at the start of the year. About DKK 3 bn. of this excess liquidity was used to redeem the remaining state-guaranteed funding in July 2013. The group solvency ratio at the end of June was 13.3, while the core capital ratio was 12.5. The solvency need represents 9.2% and Arbejdernes Landsbank is considered to be in a favourable position, with a robust financial position and good liquidity. The Group interim results of DKK 274 mill. before tax fully meet our expectations for the half year of around DKK 160 mill. before tax. Mainly the return on our securities portfolio developed more favourably than anticipated. Expected profit before tax for the year has therefore been adjusted upwards to a level of DKK 400-450 mill. before tax, corresponding to a return on equity of about 11-12% per annum.

On behalf of the Board of Directors

Poul Erik Skov Christensen *Chairman of the Board of Directors*

^{*)} The definition of growth in loans for the period was changed in the 2nd half year of 2012. Comparative figures have been adjusted.

First half year of 2013 for the Arbejdernes Landsbank Group

In the first half year of 2013, Arbejdernes Landsbank continued its growth of recent years in respect of number of customers as well as business activity. In June 2013, the Bank took over the portfolio of customers from Østjydsk Bank; this included three branches in Skanderborg, Horsens and Vejle. The portfolio comprises about 7,000 customers with business amounting to around DKK 1.7 bn. in terms of deposits, loans and guarantees. The takeover is well attuned to the Bank's 2015 vision and the Bank has great expectations that these branches will add to the Bank's presence in East Jutland. The branch in Vejle will be merged with our existing branch in the town, whereas so far the other branches will be continuing their activities independently.

The remainder of our business is also growing, and in 2013 the Bank welcomed more than 10,000 new customers (net) through our existing branch network.

In January 2013, the Bank outsourced its money supply to Bankernes Kontantservice A/S. Nine employees as well as machinery and fixtures and equipment in the amount of DKK 4 mill. were included in the agreement.

Income statement

Core earnings for the first half year 2013 bear testament to increasing activity at DKK 800.9 mill. against DKK 770.3 mill. for the corresponding period last year.

Net fees and commission income increased by DKK 0.8 mill. to DKK 182.3 mill. and this is due to moderate loans activity, excluding loans following from customer growth.

Trading earnings are at par with the corresponding period last year showing a minor decrease of DKK 0.3 mill. to DKK 42.3 mill.

Staff costs amounted to DKK 348.5 mill., corresponding to an increase of 2.5%, which is attributable to collective agreements and an increase in the rate of payroll taxes. The number of employees compared with the end of 2012 has increased by seven (average), and now totals 1,068 (average) in terms of full-time equivalents. In connection with the takeover of the portfolio from Østjydsk Bank as of 26 June 2013, the Bank also welcomed 22 new colleagues.

Administrative expenses amounted to DKK 268.3 mill. against DKK 245.2 mill. in the first half year of 2012, and this increase of DKK 23.1 mill. reflects the financial consequences of a number of growth-related projects.

Core profit before write-downs amounted to DKK 184.0 mill., which is above expectations. This is the same level as the first half year of 2012 and it results from higher levels of activity which led to increasing costs in order to deal with the growth in customers and business activities.

Write-downs on loans and receivables, etc. amounted to DKK 88.9 mill., which is a significant improvement compared with the corresponding period last year. This meets expectations for 2013 and confirms our confidence that 2013 will be the turning point in relation to the level of write-downs. The write-down ratio for 2013 is expected to end at a level of 0.8-0.9%.

Accumulated write-downs and provisions on loans and guarantees amounted to DKK 1,159.3 mill., corresponding to 5.2% of total loans and guarantees.

In the first half year of 2013, investment portfolio earnings excl. investment securities were positively affected by tightened credit spreads on the financial markets and the Group achieved a return of DKK 138.5 mill. against DKK 149.7 mill. for the first half year of 2012. This result is extremely satisfactory.

Investment securities, which include a number of sectoral shares and shareholdings in a number of important cooperation partners showed a positive result of DKK 62.3 mill. against DKK 28.8 mill. in the first half year of 2012 and this is primarily attributable to good results in ALKA Forsikring and LR Realkredit.

Result before contributions to sector solutions of DKK 295.9 mill. are considered very satisfactory and were achieved through additional investments in our production resources in order to deal with the continued growth. This gives rise to optimism with regard to continued consolidation in the coming years to underpin the sustainable growth strategy.

Contributions to sector solutions showed expenses of DKK 21.4 mill. In addition to ordinary contributions to the new depositor's guarantee scheme adopted in March 2012, this item includes the Bank's share of expenses incurred by the Winding Up and Restructuring Department.

Profit before tax amounted to DKK 274.5 mill. Tax was calculated at DKK 44.6 mill., and profit after tax which is equal to comprehensive income totalled DKK 229.9 mill. against DKK 158.8 mill. for the corresponding period last year.

Balance sheet

The Group **balance sheet** total amounted to DKK 38.2 bn. at the end of the first half of 2013, against DKK 36.8 bn. at the end of 2012.

Total **loans** amounted to DKK 18.5 bn. against DKK 17.8 bn. at the end of 2012. Customer influx, including the takeover of the customer portfolio from Østjydsk Bank, was the main reason for increasing loan levels.

The sum of large exposures amounting to 10% or more of capital base accumulated to 72% of capital base and comprised five exposures.

Deposits amounted to DKK 26.4 bn., demonstrating growth of DKK 2.7 bn. compared with the end of 2012. In the first half year of 2013, the Bank reduced deposits by about DKK 2 bn. when it redeemed deposits with state-guarantee taken up through "Bank Package II". Real growth of 4.7 bn. was generated from private as well as corporate customers, of which approx. DKK 1 bn. is attributable to customers from Østjydsk Bank, which was taken over in June 2013. We also see this as confirmation that we offer competitive terms and that our customers feel secure with Arbejdernes Landsbank.

The **securities portfolio** in the form of bonds, shares, etc. and investments in associates was reduced to DKK 14.4 bn. against DKK 15.7 bn. at the beginning of the year. As part of the agreement with Østjydsk Bank, the Bank acquired shares in DLR-Kredit in the amount of DKK 75 mill. but still only has a moderate ownership interest of less than 2% in the company.

Solvency and equity

At the end of the first half year, Group solvency was 13.3% with a solvency need of 9.2%. More information about the solvency need calculated quarterly is available on the Bank's website under Solvency need, where the composition of solvency need is also described in more detail.

The core capital ratio was calculated at 12.5%. The capital base totalled DKK 3.6 bn. at the end of the half year, and weighted items totalled DKK 26.7 bn.

At the end of the first half of 2013, and after adding the profit after tax for the period, equity amounted to DKK 3.7 bn.

Liquidity

At the end of the first half year of 2013, the Group had a net deposits surplus of DKK 7.9 bn. and liquidity ratio buffers of 290% of the statutory requirement. The considerable liquidity buffers should be considered in the context of the forthcoming redemption by the Bank of state-guaranteed funding of about DKK 3 bn., which matures in July 2013. If this funding is ignored, liquidity buffers amount to excess coverage of DKK 8.1 bn, corresponding to 240%.

The "supervisory diamond"

The supervisory diamond of the Danish FSA stipulates a number of special risk areas, stating limit values which, as a point of departure, banks should meet.

These benchmarks are an integrated part of the reporting to the Board of Directors and they are considered and acted upon to counter any deviations.

Arbejdernes Landsbank A/S complies with all the benchmarks of the supervisory diamond, as presented below.

Arbejdernes Landsbank position in the supervisory diamond

| The supervisory diamond*) | Limit values | The Bank |
|---------------------------|--------------|----------|
| Stable funding | < 1 | 0.6 |
| Excess liquidity | > 50 | 297.3 |
| Large exposures | < 125 | 72.3 |
| Growth in loans | < 20 | 7.8 |
| Property exposure | < 25 | 10.5 |

^{*)} The definition of the financial ratios is explained on page 29.

Outlook for 2013

Group expectations for the 2nd half year of 2013 were characterised by moderate optimism with indications of emerging growth. No great changes in the balance sheet

are expected in the 2nd half year other than those arising from the continued influx of new customers.

We can see that our customers are still reluctant to take out debt and the current level of lending is solely being maintained through activities to promote growth. Arbejdernes Landsbank has a good reputation and, combined with attractive prices, this is helping maintain and develop deposits. In July 2013, the remaining part of the funding programme based on state-guarantees was redeemed, and the Bank has now redeemed about DKK 5 bn. The Bank still holds a comfortably large liquidity reserve, mainly invested in Danish and foreign mortgage-credit bonds and corporate bonds. The interest-rate risk is hedged regularly by selling interest derivatives.

The Bank still considers that there will be uncertainty regarding the level of write-downs and earnings from investment portfolios. In the annual financial statements for 2012 we stated that the Bank expected a profit before tax of around DKK 325-350 mill. On the basis of the interim results, this figure has been adjusted upwards to DKK 400-450 mill.

Risk and uncertainty

It is the responsibility of the Board of Directors to ensure effective risk management, including:

- that significant risks are identified,
- that systems are developed for risk management, and
- that a risk management policy and a risk framework are laid down.

Reporting on significant risks is part of the regular reporting to the Board of Directors . In this context, see note 4 in the annual report for 2012 in which the most important risk factors are described. The Executive Management are responsible for ongoing risk management, including identifying and assessing individual risks associated with the Group's business activities.

Every year, the Group issues a risk report, which is available in English on the Bank's website at www.al-bank.dk.

There have been no events during the first half year of 2013 which have been significantly detrimental to the Group risk profile.

Changes in the economic climate have an impact on realising expectations regarding the level of write-downs. Uncertainty with regard to realisation of the expectations for the remaining part of 2013 is linked in particular to developments in the market situation regarding interest rates and liquidity, as well as calculation of the need for write-downs on loans and receivables. In addition, there is a specific uncertainty in relation to the portfolio of loans and guarantees of around DKK 850 mill. taken over from Østjydsk Bank at the end of June 2013 and which is not expected to be transferred to the Bank's IT platform until Q4 2013.

To a large extent, the Bank applies derivative financial instruments to hedge general changes in interest rates, but the Bank will be affected by fluctuations in credit spreads on the financial markets.

Uncertainty is also linked to the number of credit institutions transferred to winding-up via the Financial Stability Company, which burdens the healthy credit institutions through requirements to replenish the capital in the Guarantee Fund for Depositors and Investors.

Related parties

Arbejdernes Landsbank's related parties with significant influence include the Bank's Board of Directors and Executive Management, including parties related to these as well as associates. Related parties also include shareholders who own more than 20% of the Bank's shares or has more than 20% of the voting rights.

Transactions with related parties are defined as ordinary financial business activities and operational services. Transactions with related parties are made at arm's length or calculated on the basis of actual costs. Please refer to the 2012 Annual Report for a more detailed description of transactions with related parties.

There have been no significant transactions with related parties in the first half year of 2013, except for a capital contribution to the Bankernes EDB Central, BEC of DKK 20.6 mill., after which the ownership interest amounts to 22.9% compared with 22.7% at the start of 2013.

Statement by management

The Board of Directors and Executive Management have today discussed and approved the interim report of Aktieselskabet Arbejdernes Landsbank and the Group for the period 1 January to 30 June 2013.

The consolidated financial statements are presented in accordance with IAS 34, Interim Financial Reporting, which have been approved by the EU, and the parent's financial statements and the management's review are presented in accordance with the Danish Financial Business Act. In addition, the interim report has been prepared in accordance with Danish disclosure requirements for interim financial reports of financial companies with listed securities.

In our opinion, the consolidated financial statements and the interim financial statements for the Parent Company provide a fair presentation of the assets, liabilities and financial position of the Group and Parent Company as at 30 June 2013, as well as of the results of the activities and cash flows of the Group and Parent Company for the period from 1 January to 30 June 2013.

We also believe that the management's review provides a true and fair report of the development of the activities, financial situation, result for the period as well as the financial position of the Group and Parent Company as a whole for the undertakings covered by the consolidated financial statements, as well as a description of the most significant risks and uncertainty factors that may influence the Group and the Parent Company.

The interim report has not been audited nor has it been reviewed by external auditors.

Note 1. Accounting policies

The Group interim financial statements is presented in accordance with IAS 34, Interim Financial Reporting, as adopted by the EU, and the IFRS Executive Order for financial undertakings. The interim financial statements for the Parent Company are presented in accordance with the Danish Financial Business Act, including the Executive Order on financial reports for credit institutions and investment companies, etc. Interim financial statements for the Group and the Parent Company are also presented in accordance with further Danish disclosure requirements for interim financial reports for financial undertakings which have issued listed securities.

Apart from the information provided below, the accounting policies in this interim report are unchanged in relation to the accounting policies in the consolidated financial statements and the parent's financial statements for 2012. The annual report for 2012 was prepared in accordance with the International Financial Reporting Standards (IFRS) as adopted by the EU and further Danish disclosure requirements for annual reports of listed financial undertakings.

We refer to the annual report for 2012 for further descriptions of the accounting policies.

Changes in accounting policies

As of 1 January 2013, Arbeidernes Landsbank has implemented the following new and changed standards and interpretations:

- IAS 1, Presentation of Financial Statements Presentation of other comprehensive income (June 2011)
- IAS 19, Employee Benefits: Recognition, presentation and information on pension schemes based on benefits (June 2011)
- IFRS 7, Financial instruments: Disclosures
- IFRS 13, Fair Value Measurement

The implementation of the changed IAS 1 means that the items in other comprehensive income is broken down by items which may be reclassified to the result at a later stage in relation to other standards and items, respectively, which cannot be reclassified to the result at a later stage. This implementation will not affect total amounts for other comprehensive income, and the Group has no amounts in the interim financial statements for recognition under other comprehensive income.

The implementation of the changed IAS 19 means that all changes in the expected pension liabilities and assets of the pension scheme must be recognised immediately.

Furthermore, presentation concerning pension schemes based on benefits is changed in the statement of comprehensive income such that annual pension costs and the calculated interest on net liability/asset at the beginning of the period are recognised in the result, whereas actuarial gains and losses (due to remeasurement) are recognised in other comprehensive income. There is no changed effect hereof in the financial statements.

The change in IFRS 13 and section 38a of the Danish Executive Order on the Presentation of Financial Statements specify that the fair value of an asset or liability is the listed price of an asset (market) of the asset or liability concerned. If there is no active market, fair value is measured by means of an appropriate valuation method encompassing all data available which market participants are assumed to want to take into account when setting prices, as the use of relevant observable data is maximised and the use of non-observable data is minimised. There is no changed effect hereof in the financial statements.

In addition, the implementation of IFRS 13 and the consequential corrections in IAS 34 means that further information is provided in the interim financial report concerning fair values of financial instruments, which is seen in note 21.

The implementation of the change to IFRS 7 has not affected the interim financial report as the Group has not made setoffs in financial instruments.

The interim report is presented in Danish kroner (DKK) which is the functional currency of the Parent and rounded off to the nearest DKK 1,000.

Note 2. Significant changes in accounting estimates

Measurement of certain assets and liabilities requires management estimates. The most significant estimates made by the management in connection with recognition and measurement of these assets and liabilities, and the most significant estimation uncertainties in connection with preparing the half-year interim report for 2013, are the same as for preparing the annual report for 2012. Please refer to this annual report.

Unusual circumstances

The interim report for the first half year of 2013 has been affected by the following unusual circumstances:

Business activities managed by other credit institutions

On account of the takeover of the Østjydsk Bank portfolio as of 26 June 2013 with business activities within deposits, loans and guarantees totalling DKK 1.7 bn., the 2013 interim report reflects uncertainty about correct recognition and distribution as the business activities have not been converted into the Bank and the Bank's IT platform.

Note 3. Events occurring after expiry of the accounting period

No events have been assessed to have taken place, other than the circumstances mentioned in the expectations for the rest of 2013, which significantly affect the financial position of the Group and the Bank.

5 Segment information for the Group

Group activities are concentrated in Denmark with focus on banking services for private customers, small and medium-sized enterprises as well as associations, etc. Banking services are offered across customer types in the entire branch network as well as in the Bank's group company; AL Finans. The return on these activities is expressed in the core profit, see the core earnings model on page 4 in the interim report. Activities under core profit depend, however, on the Bank's investment portfolio activities where the Bank's liquidity is secured, but also under which the Bank's strategic sector shares belong. Regular operating reporting to the Executive Management includes the information and the aggregation level appearing in the model. On the basis of this, the Group is considered to have one operating segment, which includes core profit and investment portfolio earnings as one item.

The Bank is a party to various judicial proceedings and disputes. The cases are regularly assessed and the necessary provisions are made in accordance with an assessment of the risk of losses. Pending judicial proceedings are not expected to influence the Group's financial position.

Loan to Totalkredit provided by the Bank in 2007 is covered by an agreement on a right of set-off against future commissions, which Totalkredit may invoke if losses are ascertained on the loans provided. The Bank does not expect this right of set-off to significantly influence the Bank's financial position.

The Bank's membership of Bankernes EDB Central means that the Bank is obligated to pay compensation in the event of withdrawal.

Note

21 Financial assets and liabilities admitted at fair value

Methods to measure fair value

Fair value is the price which can be obtained by selling an asset, or which must be paid in order to transfer a liability through a regular transaction between independent market participants at the time of measure.

All active markets use officially listed closing prices as fair value. For financial assets and liabilities, where closing price is not available or is not assessed to reflect the fair value, assessment techniques and other observable market information are used to establish the fair value.

In cases where observable prices based on market information are not available or not deemed to be useful in establishing fair value, recognised techniques and own assumptions are used to establish fair value. Assumptions may be recent transactions in comparable assets or liabilities, interest rates, exchange rates, volatility, credit spread etc.

Note

Definition of financial ratios

Financial ratios are listed in accordance with the requirements laid down in the Danish Executive Order on the Presentation of Financial Statements. Earnings per share (EPS) and diluted earnings per share (EPS) are calculated in accordance with IAS 33, however, the Bank's shares are not in circulation. Other financial ratios are prepared in accordance with the recommendations and financial ratios 2010 of the Danish Society of Financial Analysts.

Capital base after deductions x 100

Financial ratios are calculated in accordance with the guide of the Danish FSA, see the Danish Executive Order on the **Presentation of Financial Statements**

| 1. Solvency ratio = | Capital base after deductions x 100 |
|--|--|
| 1. Solvency ratio — | Risk-weighted assets |
| 2. Core capital ratio = | Core capital after deductions x 100 |
| 2. core capital latto | Risk-weighted assets |
| 3. Return on equity before tax = | Profit before tax x 100 |
| 5. Retain on equity before tax | Equity (average) |
| 4. Return on equity after tax = | Profit after tax x 100 |
| Retain on equity after tax | Equity (average) |
| 5. Ratio of operating income to operating expenses | Income |
| per DKK = | Costs (excl. tax) |
| 6. Interest-rate risk = | Interest-rate risk x 100 |
| o. Interest rate risk | Core capital after deductions |
| 7. Currency position = | Currency indicator 1 x 100 |
| 7. Currency position — | Core capital after deductions |
| 8. Currency risk = | Currency indicator 2 x 100 |
| o. Cultericy lisk — | Core capital after deductions |
| 9. Loans plus write-downs in relation to deposits = | Loans + write-downs on loans |
| 3. Loans plus write-downs in relation to deposits — | Deposits |
| 10. Loans in relation to equity = | Loans |
| To. Loans in relation to equity — | Equity |
| 11. Growth in loans for the period = | (Loans, excl. repo transactions carried forward - loans, excl. repo transactions brought forward) x 100 |
| 11. Growth in loans for the period – | Loans, excl. repo transactions brought forward |
| 12. Excess liquidity in relation to statutory requirements for liquidity *) = | Surplus liquidity after compliance with section 152, no. 2 of the Danish Financial Business Act |
| requirements for inquidity) = | The 10% statutory requirement |
| 13. Sum of large exposures *) = | Sum of large exposures after deductions, excl. credit institutions |
| 13. Sulfi of large exposures) — | Capital base after deductions |
| 14. Write-down ratio for the period = | Write-downs on loans and guarantees for the period x 100 |
| 14. White-down ratio for the period — | Loans + write-downs + guarantees |
| | |
| Supplementary financial ratios | |
| 15. Earnings per DKK 1,000 nominal share = | Profit |
| | No. DKK 1,000 shares |
| 16. Equity value = | Equity x 100 |
| .o. Equity raids | |
| To Equity voids | Share capital |
| | Share capital Dividend yield x nominal value of the share |
| | Share capital Dividend yield x nominal value of the share 100 |
| 17. Proposed dividend per DKK 1,000 nominal share = | Share capital Dividend yield x nominal value of the share 100 (Loans, excl. repo transactions carried forward - loans, excl. repo |
| 17. Proposed dividend per DKK 1,000 nominal share = | Share capital Dividend yield x nominal value of the share 100 (Loans, excl. repo transactions carried forward - loans, excl. repo transactions carried forward) x 100 |
| 17. Proposed dividend per DKK 1,000 nominal share = 18. Growth in loans *) = | Share capital Dividend yield x nominal value of the share 100 (Loans, excl. repo transactions carried forward - loans, excl. repo transactions carried forward) x 100 Loans carried forward 1 year previously (Gross loans and guarantees within the sector "Completion of building |
| 17. Proposed dividend per DKK 1,000 nominal share = 18. Growth in loans *) = | Share capital Dividend yield x nominal value of the share 100 (Loans, excl. repo transactions carried forward - loans, excl. repo transactions carried forward) x 100 Loans carried forward 1 year previously (Gross loans and guarantees within the sector "Completion of building projects" + the sector "Real property") x 100 |
| 17. Proposed dividend per DKK 1,000 nominal share = 18. Growth in loans *) = 19. Property exposure *) = 20. Stable funding *) = | Share capital Dividend yield x nominal value of the share 100 (Loans, excl. repo transactions carried forward - loans, excl. repo transactions carried forward) x 100 Loans carried forward 1 year previously (Gross loans and guarantees within the sector "Completion of building |
